1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

The following changes have been made to the subject application:

**Specification:**

Page 4, line 12, "Figure 4" has been changed to --Figures 4A and 4B--.

2. The following is an examiner's statement of reasons for allowance: the amendment filed 12/01/2005 has overcome the prior art of record. The prior art of record fails to teach or fairly suggest a signal inverter coupled to the first DC error amplifier output signal to set a switching point for the signal inverter, the signal inverter operating as an open loop signal level detector, wherein an input signal is coupled to the signal inverter for detecting a signal level of the input signal as called for in claim 1, fifth means for coupled to the first feedback signal to set a switching point for the fifth means, sixth means coupled to the second feedback signal to set a switching point for the sixth means as called for in claim 6, biasing a first signal inverter with a first DC error amplifier output control signal, biasing a second signal inverter with the second DC error amplifier output control signal, detecting a level of an input signal applied to inputs of the first and second signal inverters using the first and second signal inverters as an open loop signal level detector as called for in claim 10. Therefore, claims 2, 6-8 and 10-11 are presently allowed.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue
